

Dear Customer,

Thank you for purchasing the best Virtual Reality stock rifle solution.  
Contact us on Discord, Facebook, or Reddit for any questions.

To build your ProTubeVR, please, follow this tutorial:

First, be sur to work on a clear area, some parts are very small, be careful to not lose them.

Build your ProTubeVR will take around 1h30.

## Step 1: Back end

1.a- Put the wedge on the ring and put them both on the small tube

1.b- Put the two connections with internal notches on each part of the small tube and screw them with the Hex key

1.c- Apply some oil all around the notches on the connection which is the nearest from the ring

1.d- Put one O'ring on the 20mm screw, slot them both into the hole provided in the bach-end

1.e- Then slide the notched washer and the previously oiled connection over the screw

1.f- Attach the screw securing the stock and the connection with one O'ring and the nut

1.g- Screw all the pieces together taking care not to over tighten. You must be still able to rotate the back-end by force

Enjoy feeling the Game!

The ProTubeVR Team

## Step 2: Back side

2.a- Apply some oil all around the notches on the T-notched connection

2.b- Put one O'ring on the 20mm screw, slot them both into the hole provided in the cup

2.c- Then slide the notched washer and the previously oiled T-notched connection over the screw

2.d- Attach the screw securing the cup and T-notched connection with one O'ring and the nut

2.e- Screw all the pieces together taking care not to over tighten. You must be still able to rotate the two parts by force

2.f- Unscrew the 18mm screw at the base of the T-notched connection.

2.g- Set the Hex washer on the T-notched

2.h- Deposit some oil on the Hex washer

2.i- Attach the butterfly screw with the Hex screw then screw the butterfly screw with a nut on the other side

2.j- Slide the medium tube into the T-notched connection. Then place the external notches connections on both sides of the tube

2.k- Finally screw the external notches connections on the tube

2.l- Apply some oil all around the external notches of the rear side

Enjoy feeling the Game!

The ProTubeVR Team

2.m- Place one O'ring on the 18mm screw (the one from 2.f), slide them both through the internal notched connection and the external connection.

2.n- Attach the screw securing both connections with one O'ring and the nut

2.o- Screw all the pieces together taking care not to over tighten. You must be still able to rotate the two parts using force

### Step 3: Front side

3.a- Attach each butterfly with one Hex screw

3.b- Apply a dot of oil on the base of the T-smooth connection

3.c- Slot one butterfly screw into the hole provided in the cup first, then into the rubber washer and finally into the T-smooth connection, secure with a nut

3.d- Slide the other butterfly screw through the T-smooth connection and secure it with a nut

3.e- Attach the screw securing the cup and the T-smooth connection with nuts

2.f- Put the previously assembled part through the long tube

3.g- Put the wedge on the ring and slide them through the back of the tube

3.h- Put the connection with internal notches on the tube and screw it with the Hex key

2.i- Deposit some oil around the internal notches

Enjoy feeling the Game!

The ProTubeVR Team

3.j- Place one O'ring on the 20mm screw, slide them both through the external notched connection and the internal connection

3.k- Attach the screw securing both connections with one O'ring and the nut

2.l- Screw all the pieces together taking care not to over tighten. You must be still able to rotate the two parts by force

## Step 4: Adjustment

4.a- Bend all the connections at an angle of 90° so that the ProTubeVR almost forms a square

A.b- Adjust the medium tube with the top of the stock

4.c- Adjust the long tube with the rear of the butt

4.d- Slide the hex key through the clip so you can clip it on your ProTubeVR for later adjustments if needed

Remove the hand straps of your controllers and replace them with the ProTubeVR one's

Your ProTubeVR is now operational!!

Congratulations and enjoy feeling the game with the best riffle stock solution!
